IDENTIFIERS	*Washington

ABSTRACT

This publication is intended to provide an accurate and current compilation of data on student enrollments in Washington community colleges for the academic year 1975-76. Historical enrollment data is included as is summarized student demographic data collected during the fall quarter of 1975 only. Thirty-five tables reflecting institutional and total enrollments are presented for the following categories: (1) student headcount; (2) FTE (full-time equivalent) student enrollment; (3) FTE enrollment growth; (4) annualized enrollments; (5) comparative enrollments by counting methodologies; and (6) quarterly enrollments. Data are further broken down by curriculum area and funding source. Data indicate: (1) an 8.6% increase in headcount over the previous year; (2) an 11.7% FTE enrollment increase over the previous year; and (3) vocational enrollments accounted for 46% of the total enrollment. Information on sex, age, residency, credit hour load, source, ethnic background, and educational intent is presented for academic and occupational students enrolled in the fall quarters of 1973, 1974, and 1975. A glossary of terms used in the tables is included. (Author/JDS)

INTRODUCTION

Final Quarterly Enrollments is the sixth in a series of operations reports dealing exclusively with student-oriented data for the community college system in the State of Washington. As in the case of the five earlier reports, this publication is intended to provide an accurate and current compilation of information concerning such enrollments.

In this publication, tables 1, 2, 3 and 4 contain historical enrollment data which appeared in earlier operation reports with comparable data added for the current reporting period. Additional historical enrollment information can be found in tables 23 thru 35. Student demographic data (age, sex, race) collected during Fall Quarter only, is summarized in table 36. Although state-level summaries have been provided in most instances, data by institution is available and can be furnished upon request.

The Source of these data is the 1975-76 MIS-1 Student Enrollment Report. The number of FTE students was verified by the MIS-2 Course Effort Report for the same periods. Students enrolled only in courses classified as "community service" are defined to be community service students for headcount reporting purposes. In the same manner, students enrolled for at least one credit in courses classified as "academic" or "occupational" have been defined as "academic and occupational" students. As in the past, a full-time-equivalent student (FTEs) is derived from the total number of student credit hours generated in each category divided by fifteen. The category (academic, occupational or community service) is determined by the intent of the institution in offering the course. An annualized FTE student is derived by dividing the sum of the credit hours generated for all four quarters by 45 (i.e., one annualized FTE equals 45 student credit hours).

Commencing with the 1975-76 academic year, a new enrollment counting methodology, the "Rolling Tenth Day" approach, was implemented in addition to the traditional "8th Day Plus Adds" methodology. Since FTE student data is a major component in the budgeting process of the system and historical enrollment data is used in budget development, it is necessary to understand how the old and new counting methodologies relate to each other, on a system-wide basis as well as for individual colleges and districts. Comparison tables have been added to this publication with detailed summaries for each of the counting methods. The "source of funds" supporting the enrollments is another element vital to the budgeting process and the majority of summaries have been expanded to include this item. These tables separate those enrollments supported by the state appropriation from those supported by federal or other grants and contracts.

Findings and Conclusions

- Student headcount nearly reached 160,000 during Fall Quarter 1975, an 8.6% increase over the same period last year. (Ref. Table 1)
- FTE student enrollments rose to over 89,600, an increase of 11.73% over Fall Quarter 1974 (80,203 FTEs). (Ref. Table 2)
- Student headcount has increased at a greater pace than FTEs between Fall Quarter 1971, and Fall Quarter 1975, (43.6% headcount increase between 1971 and 1975 compared to a 31.6% FTEs increase for the same period) inferring fewer credit hours taken per student on the average. (Ref. Table 1 & 2)
- On an annualized average, rolling 10th day enrollments (for academic and occupational students, State & ABE funded) were 1.88% (1,632 FTEs) less than 8th day plus adds enrollments. (Ref. Table 7)
- As a proportion of the total enrollment, vocational education enrollment grew from 28% in 1967 to its current level of 46%. (Ref. Table 3)

GLOSSARY

ACADEMIC: Type of courses offered by an institution specifically for transfer credit to Bachelor's Degree-granting institutions, developmental courses intended to bring the student to a general level of knowledge equivalent to grade 12 completion, or courses intended to be post-high school terminal course offerings applicable toward associate degree requirements.

ACADEMIC YEAR: Four quarters of the traditional school year. E.G. Summer Quarter 1975, Fall Quarter 1975, Winter Quarter 1976 and Spring Quarter 1976 equal Academic Year 1975-76.

ANNUALIZED AVERAGE (FTEs): The average number of equivalent student enrollments derived by dividing the total student credit hours generated during an academic year by 45.

COMMUNITY SERVICE: Organized courses or activities which may carry no credit and were established for the purpose of meeting community vocational needs and are not typically applicable to degrees, diplomas or certificates.

FULL-TIME-EQUIVALENT STUDENTS (FTEs): The number of full-time-equivalent student enrollments derived by dividing the total number of student credit hours by 15.

FUNDING SOURCE: The source of funds used to support each course section such as state and institutional funds; federal funds consisting of Adult Basic Education (ABE), MDTA/CETA and PREP; contracted; and, "Other" (state) funds.

HEADCOUNT: A tally of the number of individual students (unduplicated).

INSTITUTIONAL INTENT: Classification of course sections based on the primary intent of the college in offering the course (academic, occupational or community service).

ROLLING 10th DAY COUNTING METHODOLOGY: The net number of enrollments for each course's 10th instructional day based on the quarter instructional calendar for sequential classes. "Continuous" (open entry/open exit type classes) course section enrollments are counted on a net basis at the end of the quarter in which fees are collected.

8TH DAY PLUS ADDS COUNTING METHODOLOGY: The net number of student enrollments in courses in operation as of the close of registration on the 8th instructional day of the quarter plus all subsequent official registrations and adds. Note: The "net" enrollment count for a course section should include all official adds and exclude all official withdrawals as documented by the college.

STUDENT INTENT: The reason a student is attending college (e.g, academic transfer, supplement occupational skills--refer to Table 36 for categories), differs from "institutional intent" in that it is the student's purpose--not the intent of the institution in offering the course(s).
